PROFESSIONAL SUMMARY

Detail-oriented Telecommunications Engineering student with strong skills in video/audio annotation, content evaluation, digital administration, and structured data tasks. Experienced in following detailed guidelines, reviewing digital content, organizing information, documenting technical processes, and working with web technologies. Seeking remote entry-level opportunities in video/audio annotation, data labeling, AI evaluation, content evaluation, and web development.

TECHNICAL & EVALUATION SKILLS

Data Annotation & Evaluation: Video annotation, audio annotation, content categorization, guideline-based evaluation, quality assurance, written feedback, and attention to detail.

Digital Tools & Collaboration: Remote collaboration, data organization, document formatting, online research, digital administration, and cloud-based productivity tools.

Productivity Software: Google Workspace, including Gmail, Google Calendar, Google Docs, and related cloud tools.

Technical Foundations: HTML5, CSS3, JavaScript, jQuery, Bootstrap, Git/GitHub, VS Code, responsive web design, DOM manipulation, and basic web animation.

Professional Skills: Clear written and verbal communication, independent problem-solving, rapid adaptability, confidentiality, teamwork, and ability to follow complex instructions.

PROJECTS & PRACTICAL EXPERIENCE

Digital Content Organization & Web Projects
- Built and managed interactive front-end interfaces using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Applied structured logic, careful debugging, and systematic attention to detail to improve project accuracy and usability.
- Practiced organizing digital content and turning ideas into simple, functional, responsive web interfaces.

Industrial Training / SIWES — Option FM 92.3 FM, Akwanga

- Gained hands-on exposure to technical media workflows, studio equipment, audio systems, and broadcast transmission.
- Documented operational processes with accuracy and developed stronger communication, teamwork, and presentation skills.
- Observed technical procedures related to broadcasting, networking, and media production workflows.

Engineering Project — Smart Extension Board with Overload Protection
- Worked on an Arduino-based hardware-software project using an ACS712 current sensor, relay, buzzer, and LCD components.
- Applied electronics, programming, testing, troubleshooting, and technical documentation to support overload protection.
- Followed defined technical parameters and improved problem-solving through practical engineering work.

EDUCATION

Federal University of Technology, Minna (FUTMINNA) — B.Eng. Telecommunications Engineering
Expected Graduation: 2029

CERTIFICATIONS

MathWorks MATLAB Onramp
MathWorks Signal Processing Onramp
Ongoing learning in JavaScript, jQuery, web development, AI tools, and AI-assisted workflows

CORE STRENGTHS

Fast learner • Exceptional visual/audio attention to detail • Guideline compliance • Independent work ethic • Process improvement mindset • High data confidentiality • Adaptability • Communication • Teamwork
